 Double layer, plain design.  
 boxed weight: 5.9 kg  
 box size: 490 x 490 x 250mm  
 sink size: overall diameter 405mm  
 internal diameter 355mm  
 depth 150mm

Vanity Sink S0004  
 Single layer drop in, plain design.  
 boxed weight: 3.6 kg  
 box size: 490 x 490 x 250mm  
 sink size: overall diameter 405mm  
 internal diameter 355mm  
 depth 155mm

## element by K.R. Lucas & Co

The **element** collection by K.R. Lucas & Co is a hand-made series of basins and sinks for kitchens and bathrooms. Designed to suit an organic style of décor, they are a natural compliment to timbers and raw surfaces.

Copper is a durable, corrosion-resistant architectural material that has been used since ancient times. The living nature of copper creates a warm and luxurious alternative to porcelain and stainless steel and is being re-discovered in architectural circles.

### Care of finish:

Copper has a living patina which will continue to evolve over time.

Our sinks are supplied in a pre-aged and un-lacquered finish. The colour will age further from the first use. Soap, detergent and water will clean the surface adequately. Avoid using copper cleaners, abrasive pads and commercial cleaning products. Use a wax polish to help to re-generate any deteriorated areas.
